TECHNICAL SKILL

- PHP (Laravel, Codeigniter, Lumen)
- Android (Kotlin, Java)
- Javascript (Node JS, Vue JS)
- Dart (Flutter)
- Python (FastAPI)

CERTIFICATION

- Bangkit Mobile Development Learning Path
- Dicoding Android Expert
- Dicoding Back-End Fundamental
- Dicoding Flutter Beginner

WORK EXPERIENCE

Website and Android Developer   **Oct 2020 - Dec 2023**
Freelance
- Translate client ideas and rough designs into functional systems.
- Develop wireframes and design prototypes for the proposed system.
- Adapt to the required system specifications and ensure alignment with project goals.
- Implement software development best practices, including code reviews and design patterns.

Android Developer Internship   **Oct 2018 - Mar 2019**
IT Brain Indonesia
- Create database relationships based on ERD diagrams.
- Develop and optimize offline Point of Sale (POS) applications.
- Collaborate closely with UI/UX designers to enhance user experience.

EDUCATION

Informatics Engineering   **2020 - 2025**
Trunojoyo University

Software Engineering   **2017 - 2020**
SMKN 2 Buduran

ORGANIZATIONAL EXPERIENCE

Computer Laboratory and Practical Assistant   **Sep 2021 - Dec 2023**
- Assisted in preparing and conducting practical sessions, ensuring the requirements tools are well prepared.
- Prepared and created the materials, tools, and software for practical sessions.
- Guided students in performing experiments and understanding the modules.
- Maintained and managed laboratory equipment, inventory, and safety protocols.
- Collaborated with faculty on research and administrative tasks related to the laboratory.

Google Developer Student Club   **Sep 2022 - Jun 2023**
- Participated in hands-on workshops and coding sessions focused on Google technologies in Android development.
- Engaged in peer-to-peer learning activities, sharing knowledge and experiences through technical presentations and code reviews with fellow GDSC members.
- Attended and contributed to GDSC Solution Challenge events, developing innovative solutions addressing local community challenges using Google technologies.
